05/07/2026 - X25 Analytics

Improvements to Event and Location Tables:

- Three new table filter options are available:
  - See Overhanging Time
  - Combine Multi-Location Calculations
  - Keep Binding Hierarchy in Filter Results
- Several usability improvements have been made to tables, including the ability to pin, move, and filter all columns individually
- Setup, Pre-Event, Post-Event, Takedown, Features Present, Features Absent, and Contribute to Calculations columns have been added to Event Tables
- Four new Partition Preference Tier columns have been added to the Events by Organization grouped table
- Bound groups now have expandable rows to better convey when sections are bound and overlapping in time

Additional Fixes and Improvements:

- Updated Quick Snapshot editing label from “Keep Dates in Date Filters” to “Keep Dates Defined in Existing Data Filters”
- Restored sample files when adding standard schedules via spreadsheet import
- Users can now press shift and select several items from the Standard Schedules list to remove a select few
