07/02/2026 - X25 Analytics

- A new Enrollment Trend report in Section Analytics lets users compare aggregated RHC data for a course across terms to highlight enrollment trends over time, displayed as a bar chart or line graph, with options to group by course, subject, or instructor
- A new "Term Code Definitions" section in Section Analytics Settings lets users review and manually adjust start and end dates for their term codes, with a "Retain Manual Entries" option to preserve user-defined dates if the SIS later supplies different values
- *Improvements for Treemaps*
  - An updated layout that includes consistent display settings and more readable maps
  - New event grouping options for day combination, start time, end time, and duration, as well as user-defined breakpoint values
  - The addition of meetings, meeting hours, and contact hours *Size By* options for events
  - A new *Shade By* field that allows users to see schedule compliance, partition match, and feature match
  - The inclusion of additional information in the detail tile
  - The addition of “Freeze” functionality to improve readability
- Updated headcount calculations for bound sets have been applied across several reports
- Fixed an issue in project-based X25 where opening the "More" menu triggered a report refresh, sometimes preventing the menu from displaying
- Resolved a Quick Start snapshot update failure that occurred for projects containing orphaned location layout data
- Addressed an issue where the Critical Time Usage report displayed meeting counts instead of headcount values when "Size by Headcount" was selected
- Fixed a visual glitch in the Enrollment Trend report where radio buttons briefly jumped in size on hover in Chrome

- *07/10/2026 Patch:*
  - Clarifications and improvements for Feature Match presentation for overlapping bound groups - Event Tables
