

09/17/2026 – Connect25

- [Organization Layouts](#) in Connect25 include a "Reset to Default" button when a custom layout has been set for an org, restoring the admin-configured default
 - [Visual Form Builder](#) improvements:
 - Form builders can set a custom "Success Message" shown to respondents after they submit a form
 - A new "Copy a Form" section on the organization Forms tab lets users copy any form they have access to, including forms outside their org, without needing permission to create forms from scratch
 - Section fields can include a header image and header text style (size and color)
 - Info Text fields show the remaining character count while a form is being filled out
 - Forms can have a header image and header text style (size and color) on the Settings tab
 - An AI icon appears next to AI-assisted features in the form builder
 - Users can cancel a form in progress, discarding a new draft or reverting unsaved changes to an existing submission
 - Connect25 dashboard [News articles](#) use their configured publish start and end dates instead of always defaulting to a 30-day publish window, and the dates can be edited after the article is created
 - *Additional Fixes and Improvements*
 - 25Live and Connect25 support a new dedicated password reset flow, and passwords can include a wider range of characters (letters, digits, spaces, and common symbols, 5 to 128 characters)
 - Corrected overlapping icons in the icon picker when searching for icons in Layout field configuration
 - Renamed the ["Save Progress"](#) button to "Save Progress & Close" on forms to make clear that saving also closes the form
 - Resolved an issue where badge images weren't loading
 - Dashboard searches return results on the first submission instead of requiring a second search
-
