10/08/2026 - Connect25

- Admins can configure the layout and fields displayed on Connect25 organization pages, similar to the existing event detail configuration
- A new "Email Template Settings" page lets admins with permissions create and manage institution-level email templates, and org officers with permission can build and save their own custom templates for reuse
- Organization role history tracks start and end dates, so transcripts can show how long a student held a role
- Students can add self-reported experiences, such as off-campus volunteering or independent projects, that aren't captured through auto-ingest; these stay unverified until reviewed by an advisor or Student Affairs
- A new workflow action can move a form submitter to a different security group based on form completion, useful for gating event request access behind required training
- Users can upload a list of email recipients for bulk messaging instead of selecting them one at a time
- When more than one System Alert is active, the alerts scroll horizontally so all remain visible, and a "Read More" option expands alert text that's too long to display
- A "Preview" column on the Forms List page opens a preview of the form without requiring it to be opened for editing first
- Submitting a Connect25 form with an embedded 25Live event form reliably creates the event in Draft state, resolving any workflow failures due to Tentative events
- Connect25 admins can export budgets by organization or fiscal year and bulk-import budget data through the Import tool, supporting annual rollover and external system integration
- A Budget Reporting dashboard for Connect25 shows budgets by organization, over/under budget status, and pending budget approvals, with the ability to click into a category for filtered detail
- *Additional Fixes and Improvements*
  - Resolved a workflow failure where a same-stage "Set Organization Status" action couldn't determine the organization ID after a "Create Organization" action ran in the same stage
  - Ensured screen readers announce updated result counts in Connect25 tile search results after filtering or selecting "Load More"

- *10/15/2026 Patch:*
  - The Forms tab on an organization page shows only forms scoped to that organization, and "My Forms" shows Event Creation, Org Creation, and General use forms
  - Addressed organization keyword search returning no results when multiple keywords are entered
