11/19/2026 - 25Live Group Administration

Feature Upvote Works!

Many of the issues in each release are based on your customer requests on the Series25 Feature Upvote site. Go to a Series25 application, log in, then navigate from the **Product Feedback** link in the **More** menu. You will be automatically authenticated.

Learn About Using Series25 Feature Upvote Customer Feedback Boards

- Admins can now set assignment windows on resources, such as a "Not Requestable" window that starts a set number of days before a reservation begins
- Dark Mode is now easier to read in the "Deselect All" option for Resource and Other Object Security, the "Welcome Message" and "Event Form Configuration" text fields, and "Default Access" in Assignment Policy Exceptions
- The "Navigate To" list in the "More" menu now shows improved text in Dark Mode, and fixed the font color in Dark Mode for the boxes used to create Assignment Policy Exceptions, including the "Affected groups and locations" box
- Ensured "Default Security" shows no permission as selected when none has been set
- Added the "Show API Documentation and User Community Forums links?" option to Tool Access in security group permissions to control whether those links appear in the 25Live "More" menu
