11/19/2026 - Connect25

- Connect25 has a new Co-Curricular Transcript: administrators can design, brand and publish the transcript layout and students can view their published, read-only transcript.
- Connect25 email editors now have a toggle above the message to choose Rich text or Visual layout, and Visual layout opens a full-screen drag-and-drop designer.
- A new Election Analytics page compares participation across several elections.
- Users can now schedule reminders to send to event attendees.

Engagement Reports improvements:

- Engagement Reports has a new Users tab that graphs each student's engagement over a chosen date range to help spot low-engagement students
- The By Organization tab in Engagement Reports has a new Select Organizations filter for choosing which organizations to chart.
- The Engagement Reports page has a new Export to Excel button that downloads the report you are viewing.
- In Engagement Analytics, starred items no longer disappear from the Events and Locations dropdowns now upon re-selection.

Forms improvements:

- Forms > Aggregations has new Submitted Date filers and an improved layout.
- In the form builder, administrators can now set up the Organization Contact Roles field with specific roles, mark each role read-only or editable, and choose whether submitters can add other roles

Workflow improvements:

- My Workflow has a new Download Outstanding Changes button which generates a spreadsheet of all outstanding requested changes in the system, not just the current user's.
- Submitters now get a Changes Requested email with a link to the form whenever changes are requested.
- Edited email content in a Send Email workflow action now previews formatted content instead of displaying HTML as raw text.

Chat improvements:

- Event chats opened in Connect25 now link to the Connect25 event record instead of the 25Live record.
- Connect25 chat now works better with a keyboard and screen readers.

Additional Fixes and Improvements:

- Election results have a new Export option that downloads an Excel workbook, with an optional breakdown by contact custom attributes.
- Event managers can now import a spreadsheet (.xlsx or .csv) from Manage Attendees to register people for an event, including past events.

- Organization Members tabs now include a Role History table which lists each member's current and past roles with Start and End dates and an Active or Inactive status.
- The User Search page has a new Badges filter which return users that have earned specific engagement badges.
- Event registration exports now include a change log that dates when registration statutes were updated
- Administrators can now add a support email address in Settings > Configuration > Appearance for users that need assistance. This option adds a Contact Support link to the bottom of the left-hand menu.
- The organization details page now shows the organization's title, matching the dashboard, and falls back to the name when there is no title.
- On an Organization Details layout, the form widget now lists every available form of the selected type instead of only the first one.
- The Request Changes window on the My Workflow page now stays open when you click outside it.
- Fixed issue where clicking the Back button to go from Connect25 to 25Live no longer results in a blank page.
- Form that have had changes requested no longer appear under Saved Drafts on the My Forms page.
- Fixed issue where organization layout header changes couldn't be saved.
- The user search no longer returns nothing when the search text includes a space, such as when entering a first and last name.
- In chat people who aren't 25Live users or don't have chat access are now grayed out and can't be selected, and groups without the new permission Tool Access: 7.2 *Access to All Users In Chat* can only message they have already messaged.
